RATE REGULATION WORK OF A YEAR

Annual Report of Interstate Commerce Commission Is Filed.

Washington, D. C., Dec. 21.—In its 24th annual report submitted to congress today, the interstate commerce commission gives particular prominence to the consideration of the eastern and western freight rate cases which are now pending before the commission. The cases have been assigned for argument on Jan. 9, 1911, and succeeding days.

Since the last annual report, the commission has announced decisions of 62 proceedings and 125 cases have been disposed of. Thus 317 cases were removed from the commission's docket within the year. 650 complaints were filed and 11 proceedings were instituted by the commission. In addition, 25 proceedings involving suspensions of tariffs were instituted.

The number of informal complaints taken up with the commission shows a considerable decrease, 3340 having been filed in 1910, against 4345 the previous year. Within the year 737 hearings and investigations respecting alleged violations of the law were held in Washington and other parts of the country.

Harmful Classifications.
The carriers, the report says, are making a sincere effort to harmonize the conflicting features of the various classifications, but it will be necessary to apply the stimulus of requirements unless satisfactory results are obtained soon.

Since December 1, 1909, 44 indictments for criminal violations of the act to regulate commerce have been returned. Forty-three prosecutions have been concluded since then, and 31 pleas of guilty were received. The aggregate of penalties assessed was \$63,560.

Two verdicts of acquittal were rendered. Of the 44 indictments returned with the year, 25 were against carriers and 19 against shippers or passengers. Of the 43 prosecutions concluded, 21 were against carriers and 22 against shippers or passengers.

By the act of June 18, 1910, telegraph and telephone companies doing an interstate business were placed under the jurisdiction of the commission.

Steps have already been taken for the formulation of a system of operating tariffs and it is expected that this sys-

tem will become effective July 1, 1911. Concerning the application of the law as to telegraph and telephone companies the report says:

"There are from 25,000 to 30,000 telephone companies which make provision for interstate communication and the commission is in doubt whether it is the intent of congress to place all these companies under its supervision and control. No opinion is expressed at this time as to the administrative interpretation that should be placed upon the law in this regard."

To Control Capitalization.
The wisdom and urgent need of proper legislation for the control of railway capitalization are urged upon congress.

Inquiry into railway accidents within the year ended June 30, 1910, shows that the number of passengers killed in train accidents was 227 as compared with 131 the previous year. The number of employees killed in coupling accidents increased from 161 in 1909 to 207 in 1910, or 23 percent.

It is pointed out that, notwithstanding the increase in casualties a marked improvement is noted in the practices of railroads in guarding against violations of the safety appliance laws.
